PROFESSIONAL SUMMARY

Computer Science undergraduate with hands-on experience in mobile, web, and full-stack application development. Experienced in Flutter, React Native, React, Laravel, Node.js, Firebase, PostgreSQL, MySQL, MongoDB, and REST APIs. Currently working as a Mobile App Developer, contributing to real-world application development, feature implementation, API integration, testing, and performance optimization. Strong interest in building scalable, user-focused software solutions and applying software engineering and problem-solving skills in professional development environments.

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, PHP, Dart

Frontend: React, React Native, Flutter, HTML5, CSS3, Tailwind CSS

Backend: Node.js, Express.js, Laravel

Databases: MongoDB, PostgreSQL, MySQL, Firebase Firestore

Tools and Technologies: Git, GitHub, Postman, VS Code, MySQL Workbench, Firebase, REST APIs

WORK EXPERIENCE

Full Stack Developer (Mobile & Web) | JobAlign Software Solutions

November 2025 – Present

- Develop and maintain mobile applications using Flutter and React Native, alongside web applications using React and Laravel.
- Build responsive user interfaces, implement backend functionality, and integrate REST APIs.
- Integrate Firebase services and manage database operations for reliable application functionality.
- Collaborate with the development team in an Agile environment to implement features, test applications, debug issues, and optimize performance.
- Participate in the software development lifecycle, from requirements analysis to implementation, testing, and deployment.

Technologies: Flutter, Dart, React Native, React, Laravel, Firebase, REST APIs, Git

Key Company Projects

1. Adam Foundation (Family Ledger) – Microfinance & Ledger Management Application

LinkedIn Project Post: https://lnkd.in/p/gNq-nS4F

- Contributed to a mobile application integrated with JBooks Cloud for microfinance and community ledger management.
- Implemented member management, loan issuance, repayment tracking, and financial transaction features.
- Integrated REST APIs using Dio, with Bearer token authentication and session persistence.
- Implemented on-device PDF generation and export functionality for financial statements.

Technologies: Flutter, Dart, Dio, REST APIs, JBooks Cloud, SharedPreferences, PDF, Printing

2. Gold Information Mobile Application

- Developed and maintained mobile application features for a gold information and pricing platform.
- Integrated REST APIs and Firebase services to support application functionality and data access.
- Contributed to backend integration and server-side business logic using Laravel.

Technologies: Flutter, Dart, Laravel, Firebase, REST APIs

PROJECTS

AI-Powered Grocery Mobile Application

Technologies: React Native, React, Node.js, PostgreSQL

- Developed a full-stack AI-powered grocery application with personalized recommendations and smart shopping list features.

- Architected and implemented scalable frontend and backend modules for end-to-end application functionality.
- Designed and managed PostgreSQL database structures for product catalogues, user data, and transaction records.
- Developed as a university project based on an actual client requirement.

HomelyPro – Home Service Provider Application

Technologies: Flutter, Dart, Firebase | GitHub: github.com/mohamediflal/homlypro-app

- Built a mobile platform connecting homeowners with verified local service providers for on-demand home services.
- Implemented secure user authentication and real-time Firestore database functionality.
- Designed and developed responsive, intuitive user interfaces following modern mobile UX principles.

AgriLink – Agriculture Web Application

Technologies: React, PHP, MySQL | GitHub: github.com/Nazik2020/Agrilink-Agri-Marketplace

- Developed a web-based platform enabling farmers and buyers to connect, trade, and access agricultural resources.
- Implemented frontend and backend modules with role-based access control.
- Managed MySQL database operations with a focus on reliable performance and data integrity.

RESEARCH EXPERIENCE

Multi-Metric Lazy-Greedy Framework for Critical Region Identification in Structural Brain Networks

Uva Wellassa University of Sri Lanka | 2026 – Present

- Developing a graph-based Multi-Metric Structural Disruption Scoring with Lazy-Greedy Optimization (MSDS-LG) framework for efficient key-player identification in structural brain networks.
- Integrating Hub Candidate Selection, Priority Queue construction, Lazy-Greedy Optimization, and multi-metric structural disruption scoring.
- Working with structural brain network datasets involving Normal Control (NC) and Alzheimer's Disease (AD) subjects.
- Evaluating structural network disruption using Global Efficiency, Modularity, and Clustering Coefficient.
- Implementing and evaluating the proposed approach against existing key-player detection methods based on computational efficiency and identification performance.

EDUCATION

Bachelor of Science Honours in Computer Science and Technology

Uva Wellassa University of Sri Lanka

Final Year | Current GPA: 3.40 / 4.00 | Expected Graduation: 2027

SOFT SKILLS

Problem Solving, Teamwork, Communication, Adaptability, Critical Thinking, Time Management
